

When you see these icons -- select 'Options'.

This item appears about mid-screen .. click on 'Change Password'.

A form with a grey background. On the left, the text 'New password:' is followed by a text input field. To the right of the input field is a button labeled 'Change Password...'.

The below screen should appear.

Internet Service Manager

for Internet Information Server 4.0

Domain	<input type="text" value="29PALMS003E"/>
Account	<input type="text"/>
Old password	<input type="text"/>
New password	<input type="text"/>
Confirm new password	<input type="text"/>

Change the 'Domain' to read only '29PALMS'.

Domain	<input type="text" value="29PALMS"/>
--------	--------------------------------------

Then enter your normal Login and password – then your NEW password, twice.
Click OK.

This should then be good-to-go!
